About This Course

- Learn digital photography with a smart phone or a DSLR
- Video lessons, assignments, student workshops and demonstrations
- No special equipment needed
- Snap TONS of amazing photos with your engaging assignments
- Self-paced, video based and online

Unlock your creativity and learn the art of digital photography! Learn the basics of great digital photography in this fantastic 12 part course with just your smartphone or DSLR. This course is taught by a team of photo professionals who teach, demonstrate and discuss their craft in fun lessons, workshops and assignments. Middle and high school students also walk through the course with you as students learn in the “students workshops”. The course is entirely online, video based and self paced and it comes with an impressive photo-filed workbook that guides them through the course. Best of all, it requires no special equipment beyond a smartphone.
